

Dear Parent,

We are so pleased to welcome your child to our practice.

The first visit to the dentist may be the most important in your child's life. It's an experience that will help determine life-long health attitudes, for better or for worse. That's why we go slowly, and take the time that your child needs to feel comfortable and encourage curiosity.

We schedule first appointments early in the day, when children are more rested. You can help make this visit pleasant by reinforcing our role as the doctor who helps keep teeth healthy. On the initial morning visit, parents are welcomed to come into the clinical area so that we have the opportunity to talk with you and your child and establish a basis for trust. We'll explain everything we're doing so there are no surprises.

As for the exam itself, we'll look carefully at the teeth and gums; assess the development of the bite and how the jaws are aligned. We will clean your child's teeth which will allow us to assess your child's comfort level with dental treatment. We may take x-rays if we need a closer look- we want to know how your child's growth is coming along and determine if there may be cavities between the teeth. We will also provide a fluoride treatment and review brushing and flossing with your child.

Parents are welcome to come into the clinical area for morning appointments. Appointments after 2:00pm, parents are asked to remain in the reception area until treatment is completed.

Enclosed are a few forms for you to fill out prior to your child's appointment, directions to our office are on the back of this letter. If you have any questions or concerns, please do not hesitate to give us a call.

We look forward to meeting you!

Very truly yours,

We Care for Kids Dental, Inc
